

## Repair Project update-03- (early-ish December)

The objective of the project is to conserve the archaeology in the northern works and to stabilise and consolidate the southern spillway.

At the Northern works area the tail race is complete and gabions have all been installed.

The new weir wall is complete except for new penstocks (sluice gates) and the sump has been re-pointed.

Red letter day of 8<sup>th</sup> December, the first stones are rebuilt.

The second piece of concrete wall is 8 m long and used 13 cu m of concrete
